

# 4th Grade Graphing Lesson

Right now go to **File - Save As** and name this document - “your name” graph - and save this worksheet on the desktop.

In the **cell** labeled “Names”, type in the label of what you collected data about, such as “Favorite Teams” or “Types of pets”.

In the **rows** in **column A** type in the names of your data topics.

In **column B**, type in the number of responses for each data topic (put in the actual number, not the number word)

Click on the spreadsheet box to the left of the **A** and above the **1**, or click and drag across all of the data in your spreadsheet (words and numbers) - it should be highlighted in grey

Go to **Options - Make Chart**    Look on the **Spreadsheet Direction** page for more details

## Example

	A	B
1	My Shoes	Number of
2	boots	4
3	dress	5
4	sandels	2
5	athletic	1
